

NodeJS & MongoDB frequently asked interview questions

MongoDB Interview questions

1. Difference between update and findOneAndUpdate?
2. Difference between drop and remove ?
3. Difference between createIndex and reIndex?
4. How to get system info on which mongoDB is running ?
5. How to remove current database ?
6. How rename a collection ?
7. Difference between findModify() and findOneAndUpdate()?
8. What is MongoDB ?
9. What is a document in MongoDB ?
10. What is a collection in MongoDB ?
11. What is replica set in MongoDB ?
12. What is sharding in MongoDB ?
13. What is indexing in MongoDB ?
14. what are the different types of indexing in MongoDB ?
15. what is mapReduce in mongoDB ?
16. what is aggregation pipeline in mongoDB ?
17. Difference between update and save in MongoDB ?
18. Difference between primary key and secondary key in MongoDB ?
19. How does MongoDB ensure data consistency ?
20. How does MongoDB handle schema changes ?
21. How does MongoDB handle transactions ?
22. what is the role of the mongo shell in MongoDB ?

23. Is MongoDB better than other SQL databases? If yes then how?
24. What is the difference between MongoDB and MySQL?
25. Why MongoDB is known as best NoSQL database?
26. What are some features of MongoDB?
27. How do you Update a Document?
28. How do you Delete a Document?
29. What are the data types in MongoDB?

NodeJs Interview Question:

- 1.What is Nodejs?
- 2.How does Nodejs work?
- 3.What do you understand by the term I/O?
- 4.different b/w FE and BE?
- 5.what is npm?
- 6.what are modules are in node?
- 7.different between angular and nodejs?
- 8.which database is mostly used in nodejs?
- 9.what are the props and cons in nodejs?
10. What does even driven programming?
- 11.what is event loop?
- 12.what is event emitter?
13. What are types of api function in node?
14. What is package.json?

- 15.what is the express package?
- 16.explain asynchronous and non-blocking api in nodejs?
- 17.how to we implement async in nodejs?
- 18.what is the purpose of module.export?
- 19.what is call back function?
- 20.what is control flow function?
- 21.What do you mean by Asynchronous API?
- 22.What are the benefits of using Node.js?

Node HOE: (Hands on Experience):

1. Crud Operation with local json
2. Crud operation with mongoose connection & MongoClient
3. Practice with middlewares (authentication & authorization)
4. Validation - Joi validation
5. Unit testing - jest test , mocha , - any one testing third party
6. Connect with MySQL and do crud operation
7. Try with different queries in NodeJs (mongo & Mysql)
8. OAuth - Eg: passport , passport-google-oauth20 - do example projects
9. Mp4 files upload & download concept using Multer , Cloudinary
- 10.Nodemailer- forget password, OTP to phone number
- 11.SocketIO examples

BackEnd example projects for portfolio:

Bulk email tool
(Multer) PDF, Video, image, audio, Dashboard (Image , video,Search App)

Chat App (socketIO)
Diet suggestion app
Ecommerce Application
Expense Tracker

Once Backend practice is over, switch those mentioned topics to the FSD Project.
